

# Our Cloudy Water Problem Recommendations Are Below!

Please see our step by step solution and recommended products below. You can shop products online, [download a pdf](#) of this page or [print a shopping list](#) that you can bring in store to help find what you need.

## Problem

**Cloudy Water**

## Solution

- Step 1** Check and adjust total alkalinity, pH and calcium hardness to proper levels.
- Step 2** Clean the filter with [Baquacil® Universal Filter Cleaner](#) per label directions. Continue to either Step 3(a) or Step 3(b), depending upon specific water clarity.
- Step 3** **a. IF POOL BOTTOM IS VISIBLE:** Use [Baquacil® Flocculant](#) as a filter aid per label directions then continue to Step 4..
- b. IF POOL BOTTOM IS NOT VISIBLE:** Broadcast [Baquacil® Flocculant](#) per label directions. Once debris has been vacuumed to waste, continue to Step 4.
- Step 4** Test and adjust [Baquacil® Sanitizer](#) level to 50 ppm and add a start-up dose of [Baquacil® Oxidizer](#).
- Step 5** Continuously filter until the pool is clear. Backwash or clean the filter as needed, based upon filter pressure.
- Step 6** If pool still is cloudy, see your Authorized Baquacil® dealer for advice.
